

- Preventive and emergency service
- All equipment and manufacturers supported
- ASME certified
- PC, PLC, and control system experts
- 24-Hour on-call support

ASC is a manufacturer of autoclaves, ovens, presses, and advanced control systems, and has been servicing related equipment at major aerospace firms for over a decade. ASC's service & maintenance customers include the largest names in the industry with an equipment base of thousands.

ASC services hundreds of different manufacturers of equipment, including Grieve, Despatch, and Blue-M ovens and furnaces, TEC, Baron, United McGill autoclaves, Wabash, TMP, and PHI presses.

Off-the-shelf solutions

If new hardware is required ASC will work to find an effective, practical and non-proprietary solution available. We don't strap you with a "proprietary" solution like some other companies. We only use quality off-the-shelf components for all our rebuilds, reworks, and retrofits.

Knowledgeable staff

ASC knowledgeable staff includes professionals in the following disciplines: electrical, mechanical fabrication, welders, plumbing, supported by experienced mechanical, electrical, and software engineers.

Whether your maintenance effort involves one or a

hundred pieces of equipment, ASC full-time staff will provide the same high quality service every time.

Fixed Price Programs

ASC can design a custom tailored maintenance program for you and your equipment needs. ASC offers a fixed price annual preventive and emergency maintenance program that includes all parts and labor. Maintenance on your equipment becomes ASC's responsibility. Imagine that! Maintenance without the headache.

Annual Preventive Maintenance Contracts

If your maintenance effort outweighs your maintenance resources, ASC can help. ASC offers annual discounted preventive and remedial maintenance programs designed to assist you in those "crunch" times or year round.

24 / 7 / 365

ASC is working when you are. Special 24-hour service contracts are available.

Call us to discuss your service & maintenance needs.
